insertImage failed: Error reading skin folder" i removed all of my system apps then reinstall all of my system apps, still i am getting this error can anyone help me out? Seydefreak: ubuntu upgrade to the beta2 versions Seydefreak: the beta 2 are not stable. Seydefreak, I just tried to upgrade to 16.04 LTS and it broke I got some errors about my source packages So I apt-get -f install and then it was all fine k1l\_: thanks for info, seems that i have to wait untill 16.04.1 that was because 16.04 is so much buggy younder: upgrade works quite smooth for most younder: that is the good part. just be aware that 16.04 can be a bit unstable since it is in development. k1l\_, For me it was a pretty good day i'm going to do apt-get dist-upgrade anyway, i haven't

---

worked with ubuntu on laptop since ages i did an upgrade from 15.04 to 16.04, no probs here Seydefreak: you need to go to #ubuntu+1 for support for 16.04 (you are running 15.10 now) Seydefreak: there's no way to upgrade from 15.10 to 16.04. only do-release-upgrade to 16.04 I did 16.04 - still buggy. thanks younder, which iso did you use? OerHeks, plain dist-upgrade from the iso image OerHeks, same thing as I do with every version. Upgrade from Live what is the diff between the ubuntu-16.04-server-amd64.iso and the ubuntu-16.04-server-i 82157476af
